

Project Gateway[®] 6.00 Release Notes

Copyright (c) 2004 by Marin Research, Inc.

September 2004

V6 is a major release in the Project Gateway series.

V6 contains fundamental new facilities such as process management, schedule templates, integrated checklists, and group review.

The documentation has been extensively revised to incorporate all the new and revised features.

All project managers should upgrade to the V6 version of the Project Gateway tools. These tools are backward compatible with all Project Gateway Repository designs so you may update them without necessarily updating the database designs.

In general, you can upgrade existing Project Gateway databases to V6 without difficulty. Please see the instructions in the System Administrators Guide.

REGISTRATION

If you are a new Project Gateway user, please fax in your signed license form so that we can contact you or send updates when appropriate. We are located at the following address

Marin Research, Inc.
9650 Gateway Drive, Suite 102
Reno, Nevada 89521

Phone: 775-853-9784

Fax: 775-853-9788

WEBSITE: <http://www.marinres.com>

E-mail: info@marinres.com

The Project Gateway 6 User Manuals provide instructions for the use of this software. You will find an electronic version on the support section of our web site.

Project Gateway 6 databases are provided in both Notes 5 and Notes 6.5. file formats. We recommend using Notes 6.5 because of its better web support.
